

Pacific Northwest DMR

Are you missing out?

Digital Mobile Radio (DMR for Hams) has arrived in Washington

MotoTRBO or simply TRBO, is a dynamic method to link DMR repeaters into a proven, robust Motorola digital network. DCI (Digital Communications Interconnect) and the PNW group have partnered for the Ham TRBO build-out in Idaho, Oregon and Washington state.

TRBO has 2 voice channels and 2 data channels on each repeater, all with flexible digital linking to a regional, statewide, national and worldwide systems of 1,100 Ham TRBO repeaters and 12,000 DMR Hams by a user radio's selection of talkgroups (channels).

Better Digital Signal/Audio Quality, no hiss/popping/static
Better RF range than older digital technologies, Forward Error Correction and CRC support, GPS, Text message support, 40% improvement in bat/talk time in comparison to analog

CS-700 FM/DMR Radios less than \$200!

Join us / Join our build-out / Add more coverage areas to the PNW

For general or network information contact: pnw@trbo.org or go to: pnw.trbo.org
